Unable to attach the VC++ express solution here. I do not know why the ZIP is being rejected.

So, I have posted the Form1.h which explains the process that seems to work.

```
#pragma once
```

```
namespace psocpgm {
```

```
    using namespace System;
    using namespace System::ComponentModel;
    using namespace System::Collections;
    using namespace System::Windows::Forms;
    using namespace System::Data;
    using namespace System::Drawing;
    using namespace PP_ComLib_Wrapper; /* this is also the name of the DLL which is added to
Project->References */
```

```
/// <summary>
/// Summary for Form1
///
/// WARNING: If you change the name of this class, you will need to change the
///          'Resource File Name' property for the managed resource compiler tool
///          associated with all .resx files this class depends on. Otherwise,
///          the designers will not be able to interact properly with localized
///          resources associated with this form.
```

```
/// </summary>
public ref class Form1 : public System::Windows::Forms::Form
{
public:
```

```
    PP_ComLib_WrapperClass ^ pp;
```

```
    Form1(void)
    {
        InitializeComponent();
        //
        //TODO: Add the constructor code here
        //
    }
```

```
protected:
```

```
    /// <summary>
    /// Clean up any resources being used.
    /// </summary>
```

```

~Form1()
{
