Hello Matthias

Please brute force check if "_clearfp" string is in some file in your mingw/lib folder, specially in libmsvcrt.a or in libcrtdll.a.

If yes, please try to include that lib in "WIN32 GCC" line here:

by adding for example "msvcrt" or "crtdll" (without the lib in the beginning and the .a at the end).

Please report the results (good or bad) .
