Hi-

I received this message on building gui ctrlib app with this line of code. I just checked to see that it would build something before getting started.

I will try a couple of nights ago in a few minutes and see how it goes.

```
#include <CtrlLib/CtrlLib.h>
```

```
using namespace Upp;
```

```
GUI_APP_MAIN
```

```
{  
    PromptOK("Hello world");  
}
```

I think ctrlib was named .icpp so I changed it to .cpp also. I am going to try another build out. THANKS. ERRORS below. I am using windows with gcc mingw 32 bit.

```
