Hi Koldo-

I tried to build using TDM with Win 7 service pack 1.

I had to comment out these few lines to get it to build. The lines I commented were from upp/uppsrc/Core/parser.cpp Do you think that is okay to try or would you be leery? It builds a ctrlib app but not without tweaking, and I am not sure what I disabled.

Sorry I didn't get back sooner, but I had repairs going on today in my apt (that went well) and then went into work for a bit.

Thanks very much for trying another idea.
jim

```
#ifdef PLATFORM_WIN32
 // _clearfp();
#endif

#ifdef PLATFORM_WIN32
  // if(_clearfp() & SW_OVERFLOW)
// ThrowError("number is too big");
#endif
```
