Hello Jim

Good job! . Yes, you are right. That is a problem we have to solve now. It is described in this post.

The solution could be adding this code in parser.cpp

```
#if defined(COMPILER_MINGW)
extern "C" {
 _CRTIMP unsigned int __cdecl __MINGW_NOTHROW _clearfp(void);
}
#define SW_OVERFLOW    0x00000004
#endif
```

Please try the fix and report your results in the other post.
