---

Instead of

```
if(p.Tag("foo")) { DoSomething(); } else Skip();
```

we can now write

```
if(p.TagElseSkip("foo")) { DoSomething(); }
```

instead of

```
while(!p.End()) if(p.Tag("foo")) { DoSomething(); } else Skip();
```

we can now write

```
while(p.LoopTag("foo")) { DoSomething(); }
```
