Didier wrote on Thu, 09 January 2014 17:15Hi,

I wasn't precise enough, if you modify CursorImage() a little bit:

```
 virtual Image CursorImage(Point p, dword keyflags)
 {
  LOG("CursorImage " << flag << "    keyflags="<<keyflags);  //******* MODIFIED LINE ********
  return ((keyflags & K_CTRL) !=0) ? Image::Hand() : Image::Arrow();    //******* MODIFIED LINE ********
 }
```

Well, that is why always welcome a testcase, otherwise you often end up chasing different issue...

Anyway, this one should be now fixed.

Mirek
