Hi all,

I just delivered in SVN.6763 (sandbox) the following modifications for GraphCtrl/GraphDraw:

- * Documentation
- * Added DynamicMarkerCtrl::ResetMarkers() ==> is called through [popup menu]/[Reset markers]
- * Added FULL REFRESH on MouseLeave() to prevent letting Graph partially drawn when mouse is outside the GraphCtrl
- * Add management of GraphElements with NEGATIVE priority (several elements with negative prio are allowed on same side)
- * GridAxisDraw::Paint() now takes in account StackingPriority to paint the best way possible

With NEGATIVE Stacking Priority values you can make Graphs like this :

Left Y axis is displayed inside Graph

Markers are displayed inside graph

All the Element's UI controls stays functional (Scroll, zoom, marker move, popup menus, ...)

ManfredHerr: The issue you detected is now corrected => if mouse leaves the GraphCtrl :
GraphCtrl schedules a refresh
