Hello Massimo,

Quote:

On my computer the delay is zero, when switching panes.... are you sure you've got last svn update ?

I compiled up on without gadgets like "X11 MT SSE2". I also removed all previous compilation objects files. Still not luck. Delay is felt.

I updated ide source files with following command:

svn checkout <http://upp-mirror.googlecode.com/svn/trunk/upsrsrc/ide>

If you want to make additional check I enclose my GDB2\_MI2.cpp file.

---

-----  
Edit:

Please see 515 line(GDB\_MI2.cpp):

Quote:

Sleep(20);

After commenting this line switching between panes back to normal state, but ide crashes.  
Personally, I think that something must be wrong in Gdb\_MI2::ReadGdb(bool wait) method.

Sincerely,  
Klugier
