
Subject: proposal: bool Index::HasUnlinked()

it's just a one-liner. in Index.h add

```
bool HasUnlinked() const { return unlinked >= 0; }  
to HashBase class.
```

in AIndex:

```
bool HasUnlinked() const { return hash.HasUnlinked();}
```

since you can't get reference to Hash.

the reason is that I abuse unlinking as a marker. but also in multi-threading it would be interesting to execute Sweep() in another thread, if needed.
