hi,

i was going through the functions in Date class and noticed that

there was no function type for substrating months or years from a given date.

can anybody give me the codes for substrating months or years from a given date?

for example like--

```
Date SubMonths(Date d, int months)
```

```
{
```

```
....
```

```
....
```

```
};
```

```
Date SubYears(Date d, int years)
```

```
{
```

```
.....
```

```
.....
```

```
};
```

thanks and regards,

dave
