Running the code below causes tool tip of window close button to display "Ctrl + Shift + random number" instead of correct accel key name. The same, with always a different number again, can be said when using any DockableCtrl in float mode (which I guess is a ToolWin instance, anyway). See DockingExample1, for one.

```
class MyToolWindow : public ToolWin
{
public:
typedef MyToolWindow CLASSNAME;
MyToolWindow() { }
};
```

```
GUI_APP_MAIN
{
    MyToolWindow().Run();
}
```

tk.

P.S. Running on Windows 8
