Looking at ToolButton::StyleDefault(), I see the elements below:

```
    int ToolButton::Style::contrast[6];    //
    bool ToolButton::Style::light[6];      //
    Value ToolButton::Style::look[6];      //
    Point ToolButton::Style::offset[6];    //
    byte ToolButton::Style::registered;    //
    Color ToolButton::Style::textcolor[6]; //
    Font ToolButton::Style::font           //
```

What do these style members do?

Tks!!
