Looking at ToolButton::StyleDefault(), I see the elements below:

```
int ToolButton::Style::contrast[6];      //
bool ToolButton::Style::light[6];         //
Value ToolButton::Style::look[6];         //
Point ToolButton::Style::offset[6];       //
byte ToolButton::Style::registered;      //
Color ToolButton::Style::textcolor[6];    //
Font ToolButton::Style::font            //
```

What do these style members do?

Tks!!
