
Subject: Errors during compiling the examples

Hello everybody,

I'm new to GUI programming and Ultimate++.

```
#include <CtrlLib/CtrlLib.h>
#define _WIN32_WINNT 0x501

using namespace std;
using namespace Upp;
```

```
GUI_APP_MAIN {

    PromptOK("Hello world");

}
```

I tried at first to compile the examples. Unfortunately I get errors in the example above:

```
D:\upp\uppsrc\Core\Socket.cpp: In function 'int Upp::sGetAddrInfo(const char*, const char*,  
addrinfo**)':  
D:\upp\uppsrc\Core\Socket.cpp:44:47: error: 'getaddrinfo' was not declared in this scope  
    return getaddrinfo(host, port, &hints, result);  
                           ^  
D:\upp\uppsrc\Core\Socket.cpp: In static member function 'static DWORD  
Upp::IpAddrInfo::Thread(void*)':  
D:\upp\uppsrc\Core\Socket.cpp:65:24: error: 'freeaddrinfo' was not declared in this scope  
    freeaddrinfo(result);
```

I'm compiling with MinGW. What do I have to do?

Regards

Marco
