Hi,

I can confirm this same behavior: 'Invalid memory access' error + crash running the latest SVN.6937 (GTK) on Ubuntu 13.10 x64. I could recover from it only by:

```
rm 'main package'@'nest'.cfg
```

```
in ~/.upp/theide/cfg.
```

cat theide.log shows:

```
***** PANIC: Out of memory!
```

```
Requested size: 5433259740 B
```

```
U++ allocated memory: 3616 KB
```

Best regards,

Tom
