Hi,

I think there are probably two different problems:

 crash in ide
 crash in applications

I am saying this because of some observations I made:

 ide still seems to be crashing (lattest posts)
 apps don't seem to be crashing any more ==> a test I did this WE

One week ago, I just leaved my test application running and forgot about it (so I wasn't doing anything with it, nor with my computer) ... and it crashed all by itself.
I did the same test this WE and left it running all day while playing with it from time to time : NO CRASH
