Small bug in SVN rev6982:

in function

```
int AString<B>::ReverseFind(int len, const tchar *s, int from) const
```

change line

```
if(*s == *p && memcmp(s, p, len) == 0)
```

to

```
if(*s == *p && memcmp(s, p, len*sizeof(tchar)) == 0)
```

Thanks,
Hans
