Alboni wrote on Thu, 20 March 2014 18:00Ok, I narrowed it down a bit.
There seems to be a problem when more than 1 flag is added in the same line. I added the portaudio package to a random project and hit compile without adding any extra flags to the main configuration.
Hi Alboni,

It seems that this particular thing was never supported by TheIDE I must have overlook it, when I was writing the portaudio plugin... But it is I think it is a good feature to have, so I'll try to create a patch.

I haven't yet looked at the other issue with dotted flags, but I'm sure that it used to work. So I'll try to fix that as well, if it is broken.

Best regards,
Honza
