Ok,I'm blind...

Multiple flags (and other options) are supported, but there must be a comma, not space. I will fix it in portaudio, and perhaps other packages where I might have made this mistake...

Honza

PS: Actually, there is a small bug, it doesn't work with comma either, because theide quotes the string... But I guess it doesn't really matter, as it is splitted into two lines when the .upp file is saved after being edited. So it is probably easier and more consistent to write it on separate lines right away..
