Setup->Environment->Editor->Line ending->Detect with default CRLF

I don't really understand what your problem actually is.

I have been using Win XP, 7 and Ubuntu for several years without any problem.

Could you clarify and a runnable example.

Win will work with just LF or \n without the CR (unless I am wrong).

When I parse a text string a character at a time:

0D = 13, 0A = 10

```
int ic = 0;
```

```
char ch;
```

```
for ( int i = 0; i < cc; i++ ){
```

```
    ic = (ln[i]);
```

```
    ch = ic;
```

```
    if (ic==10) continue;
```

```
---
```

This is just a quick guess.

```
if (ic==10) continue; // this just drops the 0A
```
