- Moderate user's first 5 messages

1 message was already activated. For now I would say single post to check is enough, no need to waste time with 5.

Quote:
- N messages before allowing users to post links (Users are required to post more than N messages before they can embed links into their posts)

Now there is one thing I have missed before: this option is about links in signature too. I would say it could fix the problem considerably. I have activated 1 message too here, we will see how it is going...

Well, at least we do not have any spam in the actual forum yet, just in Members...
