jerson wrote on Mon, 07 April 2014 16:37Please excuse my post. I used to have a live-bookmark to the old forum in Firefox that has stopped working now. Is there a way I can mark a live-bookmark to the new forums? I tried subscribing to the index page of the forums, but it doesn't seem to work. Perhaps I am doing something wrong.
I'm not familiar with firefox live-bookmarks, but I assume they are based on RSS or RDF feeds. The new feed address is http://www.ultimatepp.org/forums/feed.php?mode=m&l=1&amp ;basic=1

Also note that the options can be customized, as described in the help here.
