Hello,

after upgrading my system, now lubuntu 14.4, I am non longer able to compile with version 6634.
The error is

/home/luigi/upp/uppsrc/Draw/FontFc.cpp:13:29: fatal error: freetype/ftxf86.h: File o directory non
esistente

I run even

sudo apt-get install freetype*

with no success. Perhaps the new distro no longer support that file?

Thanks,

Luigi
