Hi,

probably you try to add a Ctrl to his child.

this is another example that use AutoScroller, without .lay file

hope it help:

```
#include <CtrlLib/CtrlLib.h>
```

```
using namespace Upp;
```

```
#include <AutoScroller/AutoScroller.hpp>
```

```
class AView : public ParentCtrl  
{  
    DocEdit doc0, doc1, doc3, doc2;
```

```
public:
```

```
    AView()  
{  
    SetRect(0, 0, 500, 600);
```

```
    Add(doc0.LeftPosZ(12, 68).TopPosZ(12, 44));  
    Add(doc1.LeftPosZ(12, 164).BottomPosZ(12, 176));  
    Add(doc2.RightPosZ(16, 176).TopPosZ(16, 92));  
    Add(doc3.RightPosZ(12, 176).BottomPosZ(12, 92));  
}  
};
```

```
class AScroller : public TopWindow
```

```
{  
    AView v;  
    AutoScroller<ParentCtrl> sc;  
public:
```

```
    AScroller()  
{  
    Sizeable().Zoomable();  
    SetRect(0, 0, 200, 300);  
    sc.EnableScroll();  
    sc.AddPane(v);  
    Add(sc.SizePos());
```

```
}  
};  
  
GUI_APP_MAIN  
{  
    AScroller().Run();  
}
```
