Subject: GridCtrl: Repaint bug? Posted by forlano on Sun, 25 May 2014 08:05:24 GMT

Hello,

I have a gridctrl that is sorted via a multisort each time it is feeded.

Unfortunately the grid is multisorded ONLY the first time.

Look at the first picture:

I click the left grid (third row) and some data go in the right grid that is sorted as I want with this code in the callback

arrPlayer.MultiSort(1, GridCtrl::SORT_DOWN)
.MultiSort(2, GridCtrl::SORT_DOWN)
.MultiSort(0, GridCtrl::SORT_UP);
arrPlayer.Repaint();

Now, if I repeat the same operation (Clear the grid and feed again with the same data) I get this result

So the TB column (the second one to be sorted) is not sorted properly. I do not know if this is a Repaint() problem or I need to restart/reset in some way the grid in order to be ready to perform a new multisort.

Thanks, luigi
