mingodad wrote on Sun, 13 April 2014 21:22 Here is a screenshot of the find window behind the bottom pane on lubuntu.

No multimonitor, it's a simple laptop.

This is now somewhat fixed. Anyway, the issue is broken (I think) LXDE WM - I am telling it to put the window to be aligned with the bottom of the workspace, some "smart" logic in WM moves it down behind the bottom pane.

I have simply fixed it by moving it a bit up.
