Subject: MT and variables simple question Posted by koldo on Thu, 05 Jun 2014 08:29:08 GMT

Hello all

I have a doubt about using INTERLOCKED to access variables. I think we are forced to use it when reading and writing variables in MT. However, is it necessary to use it when getting a pointer to them?

For example, is this right?:

```
Array<double> vars;
...
double *data;
data10 = &vars[10];
INTERLOCKED {
 *data10 = 23;
}
```
