Hello.

Please, can somebody look at the fix and eventually apply the changes to the Ultimate++ sources? The problem appears when I have HeaderCtrl in "absolute" mode and double-click at the HeaderCtrl at the empty place right of the last showed column. I'm sorry that in my last post it wasn't explained clearly. In fact I thought it would be obvious to anybody knowing what GetSplit does. But nor I am the one... :)

Thank you.

Gabi
