Hi, Mirek

Quote:

I think this should be more flexible (not coupled to filesystem), something like

```
HttpRequest& PostStream(Stream& s, int64 len = Null);
```

Great! That is better than mine. 8)

Quote:I would also like to ask what is the deal with all that padding code?

I am just try to make the two different part of the data combined as if they are the same continuous data, but i am really not sure if it is necessary. :blush:

Quote:I have tried that altered variant, please check it that is OK.

I will check it, and thanks a lot. :p
