koldo wrote on Mon, 11 August 2014 18:08Hello Mirek

I cannot debug 32 or 64 bit applications.

With TheIDE 32 I have compiled TheIDE 64. It works well, but when I add a breakpoint, the application crashes with an exception writing at 00000000. This happens with simple demo packages like Clock.

Debugging 64-bit or 32-bit app? What OS?

Mirek
