Hi Koldo

No problem. I have progressed quite a bit since my last posting and now I am able to get the webcam to work using VFW. I am grateful for your tips about SendMessage - that helped a bit. Lot of patience and google makes a happy man.

It will be really helpful if someone more knowledgable can shed some light on how to link multiple DLLs. Right now it is more of an academic exercise for me since my immediate problem is resolved.

Best regards  
Jerson
