Subject: From XSD to XML Posted by jibe on Tue, 09 Sep 2014 10:16:45 GMT View Forum Message <> Reply to Message

Hi,

I'm totally unexperienced with XML and have few knowledge about it... Is it possible to generate a XML starting from a XSD and introducing the data ?

Could you point me to some doc explaining how to do and eventually to a library to use in UPP for that ?

Thanks.
