Subject: Problems debugging with Visual C++

Hello Mirek,

After a very long time, I just started to do some c++ again and, hence, use theIDE. But I had quite some problems debugging with Visual C++ (2010/32 bit).
Amongst the problems are crashing (I just upgraded to rev 7655 yesterday, but did not test that one a lot) and inability to watch variables (also with 7655). All my variables are either 0 (numeric ones) or marked with '??'.
Are there any added preconditions for debugging with VC now?

Best regards,

Frank
