Subject: Successful compilation with error message.

Hello folks,

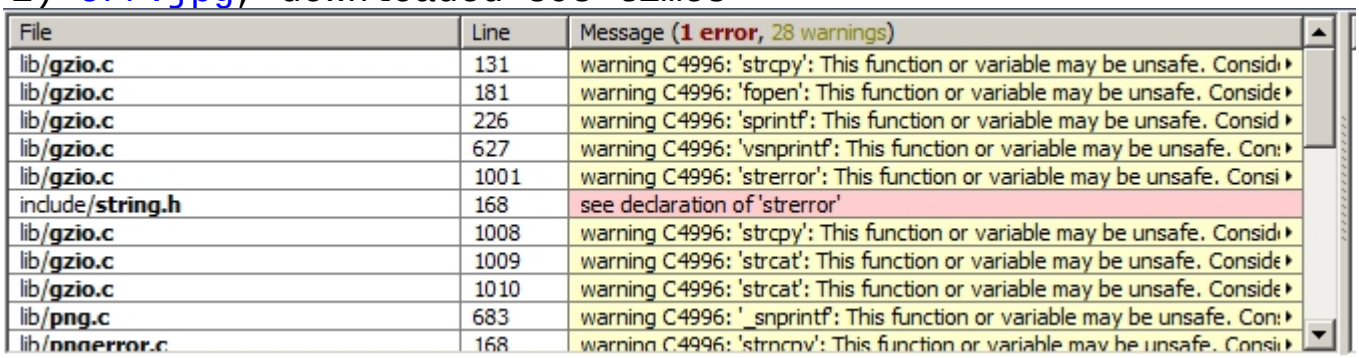

I just grabbed the latest U++ for Windows package (upp-win32-7719.exe), and set MS VC++ 2013 a.k.a Visual Studio 12 the compiler. When building the AddressBook example, configured as MSC12 Optimal, I got this error (pic attached). The same thing also happened while building httpcli.

Strangely, if you repeat the compilation process, no more error message appear and the compilation done successfully. The executables can be run properly.

Anybody else experiencing this?
