Hi,

nice work with your control.

I tested it with 607-dev3 and got 2 problems:

in main.cpp I had to change line 55 to

Ctrl::ShowRepaint(repaint * 20);

and in DateTimeCtrl.cpp I hat to change line 449 to int fh = fnt.lnfo().GetHeight();

So now it works.

Additionally I added a german translation to the t file.

What I also saw, was the days and months are already defined in Core.t so why not use them.

Greetings

Heli
