Subject: How to add a currency symbol to an EditDoubleSpin?

Hello,

is there any reliable way to add an currency symbol inside an EditDoubleSpin?

I used
.Pattern ("%2,!n€")
until now and it worked as desired (showing the currency symbol while using the double-value in calculations and still being able to use the spins).
But now it fails, stating the number is not valid. As soon as I remove the currency symbol it works again.

I am on a new setup with Windows 7 and using U++ 7821.

I tried to use Convert but also failed..

Thanks for any advice!

Kind regards,

frozen
