Novo wrote on Mon, 20 October 2014 21:06When trying to use TheIDE through ssh I'm getting a problem with the debugger (old and new).

I wonder what exactly is above supposed to mean :)

Quote:
It launches a console with a message "warning: GDB: Failed to set controlling terminal: Operation not permitted".

However this is normal and I believe it is GDB bug. I see that too when debugging console apps in linux. At the moment, I suggest to ignore that and hope GDB team will fix this issue... (otherwise, debugging works for me with GDB).
