omari wrote on Fri, 31 October 2014 16:19Hi,

the issue can be resolved by forcing the switch orientation to vertical, by adding the line

```
 type.SetVertical();
```

in the file "ide/LayDes/visgen.cpp", at line 165.

great thanks

However, it is strange anyway... I have changed the layout a bit, perhaps this will fix the issue as well.
