Subject: Drop list is not shown

There's a complex application with two TopWindows.
First TopWindow is used as a main window. The second TopWindow is a settings window which is shown from time to time.
The main TopWindow is executed with Run() call.
The second TopWindow is executed with Execute().

The problem is starting with some U++ revision, drop-down lists in settings window is not shown after user clicks list boxes. Instead of that, only black horizontal line is drawn. But right after settings window is commanded to close, a drop-down list is immediately shown and then hidden.

I've captured screencast introducing this behavior:
http://www.youtube.com/watch?v=B1jCTFANojk
(sorry for the poor frame rate).

Does anyone have a clue why drop lists behave this way and how to fix it?

OS: Windows 7 SP1
U++: revision 7881
