Thanks a lot Mirek! I searched the ArrayCtrl source and documentation for this function but I think I overlooked it.

I solved it with a derived ArrayCtrl class that implements a proxy method for the AddColumn and AddRowNumColumn:

```
ArrayCtrl::Column& CrySearchArrayCtrl::CryAddColumn(const char *text, int w)
{
    ArrayCtrl::Column& col = this->AddColumn(text, w);
    col.HeaderTab().Min(25);
    return col;
}
```

```
ArrayCtrl::Column& CrySearchArrayCtrl::CryAddRowNumColumn(const char *text, int w)
{
    ArrayCtrl::Column& col = this->AddRowNumColumn(text, w);
    col.HeaderTab().Min(25);
    return col;
}
```
