akebee wrote on Tue, 09 December 2014 09:59 RichEdit editor;
    SaveFile("test.qtf", editor.GetQTF());

i pasted some images into the editor, the "SaveFile" can save them;
Look at the test.qtf,the data is like below:

[$$0,0#00000000000000000000000000000000:Default]
[{_}
[s0;
@@image:1158&1392
(A24BuwEAAAAAAAAAAHic7d37V1vnne9x/pL+OrPK...

so how can i get these images from the richtext? 8o

What you mean by "get"? At user level? Get into editor, do copy - paste.

Programatically? That is harder, I guess at this level the easiest way is to use RichText::Iterator.
