koldo wrote on Wed, 17 September 2014 09:11Hello BioBytes

There is a new version that should solve your problem.

Unfortunately I have not found any reliable way to overcome the lack of inet_ntop in XP, so that the functions only return IP4 addresses in XP.

Hello Koldo,

I know this is somewhat an old news, and you probably already considered this, but, FYI (or for anyone who encounter the same problem), there is a function called WSAddressToString() implemented from Windows XP SP1 and on. It is the same as inet_ntop and can handle both IPv4 and IPV6 (if IPv6 stack is installed).

Regards,
Oblivion.
