Hello pfsdanny

Thank you for your test. Please comment this line in OfficeAutomation.cpp and try it:

```
bool OPENSHEET::Quit() {  
    if (!quit) {  
        quit = true;  
        if (Desktop) {  
            //Ole::Method(Desktop, "Dispose"); PLEASE COMMENT THIS LINE  
            return Ole::Method(Desktop, "Terminate");  
        }  
    }  
    return true;  
}
```
