rainbowsally wrote on Wed, 17 December 2014 18:54The changes in Core/Util.cpp work, but I got errors when I dropped the other snippet into ChGtk.cpp. It looks like a snippet from inside a function?

So I commented it out for now.

Works. :)

Finding the right place to plug it in may be a little confusing for others so in case anyone else wants to play with this, I'll upload the uppsrc/Core/Util.cpp per your changes here.

No worry, it is already in trunk and next nightly build... :)
