[http://www.ultimatepp.org/www\\$suppweb\\$chss\\$en-us.html](http://www.ultimatepp.org/www$suppweb$chss$en-us.html) it shows a screenshot of Windows XP, "Tiger" theme.

How to use this theme?

Thanks

Hi lectus,

I believe it was done by installing the theme to winXP. U++ in this case only mimics the look of the OS. Quick googling reveals the theme itself is mentioned (with download link) in this article:

<http://www.dkszone.net/windows-xp-themes>

Best regards,

Honza
