h3l1 wrote on Thu, 03 August 2006 05:24Hi,

really cool application . Is there also the possibility to get a version for linux (64-bit)?

Bye

Heli

Thanks! There will be version for linux! My frined told me that he won't test it until linux version comes up . I'm not sure about 64bit version - I don't use such a version of my linux. But I plan to release sources so probably there won't be any problem to compile it on dedicated platform oneself.
