Now that is really weird. Of course, I have tested my code before posting here (with Win8 and now Win7).

As first quick test, does DnD of text to theide work for you?

Alternatively, you can test with examples/UWord, with Image.

What is your OS exactly? Compiler?

As for your question, U++ does all that for you. All you need to do is to call "Accept" for format that you, ehm, accept...
