As for JPG: MSWord -> UWord, from the log you have posted, it looks like the problem is that MSWord actually presents it as text (rich text) and our RTF parser does not understand JPG in RTF. I am adding RM issue to add JPG support in ParseRTF....

So it looks like copy/paste is mostly working, but DnD is not.

For now, let us concentrate just on MS Word text -> UWord in Windows 8.1. Could you please activate general logging in Win32DnD.cpp at the start of file:

```
#define LLOG(x) LOG(x)
```

```
(uncomment // LOG(x))
```

try dragging text to UWord, post result here?

Mirek
