For now, let us concentrate just on MS Word text -> UWord in Windows 8.1. Could you please activate general logging in Win32DnD.cpp at the start of file:

```
#define LLOG(x) LOG(x)
```

```
(uncomment // LOG(x))
```

try dragging text to UWord, post result here?

Mirek

Did that, all attempts failed and no log ever gets created when dragging text from MS Word into UWord in Win 8.1.

Eddy.
